

Exact e-Synergy = Business Integrated

# Business Integrated = Advantage Realized

*“Only when you have total control over your entire business process can you truly focus on delivering value to your customers and harvest competitive advantages and rewards.”*

Exact e-Synergy unites the workplace and reveals the costs, inefficiencies and redundancies hidden by the complexities of your business.

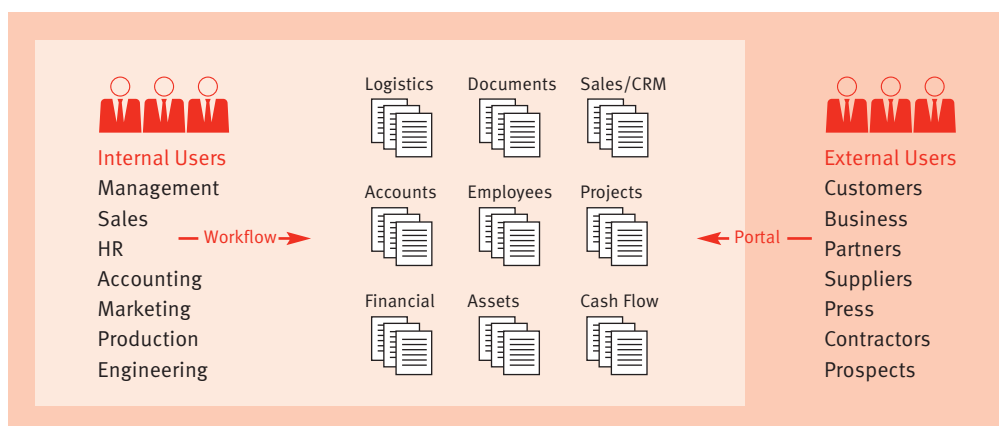

Exact e-Synergy, from Exact Software, provides a Web-based business process management solution that connects the people, processes and knowledge that matter most to your business. By creating a real-time, accurate view of an organization’s personnel, financials, workflow, documents and asset information, businesses can achieve control over their operations, enhancing decision-making, analysis and scenario planning.

With Exact e-Synergy, your entire “value chain” can obtain a portal-enabled view into the entire workplace – including employees, business partners, suppliers and customers.

Users of Exact e-Synergy benefit from its emphasis on the importance of the whole business, as well as the interdependence of its parts. The Exact e-Synergy solution captures and integrates corporate data within a single database, enabling all members of the value chain to view and act on this data, based on predefined access and their role within the system.

## Exact e-Synergy Model

With Exact e-Synergy, information is accessible to everyone through the product’s Web-based portal. Internal and external parties can access Exact e-Synergy to perform critical tasks. Security controls ensure only those with the correct access will be able to view sensitive company information.

# Midsize Business Control

In today's world, advanced technology is widely used in global enterprises to solve important business problems and improve productivity. Now, Exact e-Synergy provides these same benefits to midsized businesses, enabling them to better understand their organization and make more informed operational decisions. Exact e-Synergy delivers a complete solution suite to analyze, report, manage and run your business.

- Workflow Management tells you what everyone is doing, all the time
- Web-based project management enables team members to contribute via the Internet
- Complete relationship control, including customer relationship management (CRM), supply chain management (SCM) and partner relationship management
- Web Shop includes intuitive online cataloging and inventory control, enabling seamless e-commerce ordering over the Internet
- Document and knowledge management, including content management for all portals and websites
- Consolidated, real-time financial management, budgeting and reporting
- Human resource management, including organization, salary, rollups and workflow reporting
- Anytime, anywhere access via the Internet using your favorite handheld wireless devices

**BUSINESS INTEGRATED** Within any organization there is an information chain that structures intelligence around the people and the knowledge they provide. Traditional software only handles this information in pieces, failing to address the many connections possible with workplace data.

Exact e-Synergy makes those connections and creates a real-time environment for employees and managers to store, see and share all their work, resulting in higher performing organizations.

**COMPLETE CORPORATE VIEW** Exact e-Synergy's powerful integration capabilities provide a clear picture of major cost savings and operational efficiencies throughout your entire organization.

**AUTOMATED SECURITY** Exact e-Synergy streamlines workflow and replaces manual, unsecured processes with an environment of security, clearly defined roles and rule-based access. Managers can control access to data on a need-to-know and need-to-access basis for projects and externally-managed operations.

**REAL-TIME ACCESS** With Exact e-Synergy, you can utilize hundreds of predefined real-time report "views" over the Internet or create your own customized reports to understand every aspect of your business!
